

## Electricity costs reported under the Infrastructure Operating Fund Simple Method

April 1, 2011 to March 31, 2012

The institution may use either a detailed method or a simple method to calculate the cost of electricity related to CFI-funded equipment.

- If the institution uses a detailed method, it must establish an appropriate method to calculate its actual costs of electricity and maintain supporting documentation for all elements.
- If the institution uses the simple method, it need not calculate its actual cost of electricity, but must use the provincial rate prescribed by the CFI in the table below (rates are updated annually). This rate should be multiplied by the electrical consumption of the equipment.

Rate Table (Cost per kw/h)

	Rate (per kw/h)
British Columbia	\$0.0635
Alberta	\$0.0924
Saskatchewan	\$0.0964
Manitoba	\$0.0956
Ontario	\$0.0855
Quebec	\$0.0825
Nova Scotia	\$0.0965
New Brunswick	\$0.0917
Prince Edward Island	\$0.0774
Newfoundland and Labrador	\$0.0739

### Notes:

1. A sample [template](#) for reporting the cost of electricity related to CFI-funded equipment is also available on the CFI website ([www.innovation.ca](http://www.innovation.ca)).
2. The total electricity cost should be reported under the “Services” category in the IOF Annual Report.
