Research Facilities
Navigator
Navigateur
 d'installations de recherche

The Navigator is a free, easy-to-use search tool of research facilities in universities, colleges, hospitals, and federal government departments and agencies across Canada that are open to working with business and other partners.

A single tool with multiple benefits

For companies

It is an avenue to finding the research facilities that can help their business grow, stay competitive, design new or better products or processes, and foster relationships with highly skilled people.

For research facilities

The Navigator is a way to promote their research capabilities, attract research talent and connect with industry and other partners.

navigator.innovation.ca

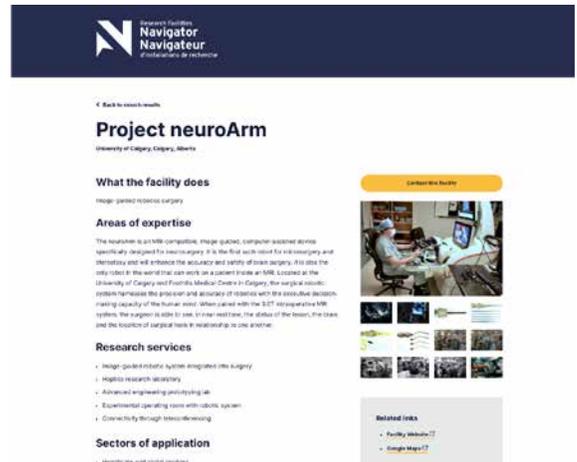

1 Explore Navigator's bilingual directory by

- location
- institution
- keyword
- services
- area of expertise
- equipment
- sector of application

2 Discover key characteristics of facilities

- area(s) of expertise, research services and specialized equipment
- current and/or potential areas for private- and public-sector partnerships
- news and multimedia
- social media platforms

3 Contact the facility directly with your enquiry

- see the names and positions of the research contacts who will receive your enquiry
- receive confirmation your message was sent, and contact information for follow up
