## 1 DEFINITIONS

**Institution** refers to the Canada Foundation for Innovation (CFI)-eligible institution or an authorized representative acting on behalf of the institution.

**Institutional administrator** refers to individuals responsible for managing CFI projects on behalf of the institution. These individuals are responsible for pre-award and post-award activities.

**Pre-award activities** encompass all activities related to applying for CFI funding, uploading supporting documents, collaborating with researchers to submit proposals, and viewing the funding decisions and review materials for proposals.

**Post-award activities** encompass all activities related to managing successful projects including award finalization, amendments, *Project progress reports* and financial reports. This also includes managing the institution's Infrastructure Operating Fund (IOF) allocation and IOF annual reports.

**Project leader** refers to individuals mandated by the institution to lead CFI-funded projects.

**Reviewer** refers to individuals who participate in the review process of proposals submitted to the CFI.

## 2 REFERENCE MATERIAL

This guide is intended for institutional administrators who use CAMS to manage pre-award and post-award activities. Other guides are available, depending on your role and the type of activity you perform in CAMS.

**Researcher:** If you are a researcher, please refer to [\*Getting started with CAMS: An overview document for researchers.\*](#)

**Reviewers:** If you are a reviewer, please refer to [\*Getting started with CAMS: An overview document for reviewers.\*](#)

## 3 WHAT IS CAMS?

The Canada Foundation for Innovation Awards Management System (CAMS) is the secure online portal that allows universities, colleges, research hospitals and non-profit research institutions to apply for CFI funding and assists them in managing the full life cycle of a CFI-funded project.

CAMS allows institutional administrators to manage pre-award and post-award activities related to CFI funding. It also allows researchers to prepare proposals for internal submission to the institution, as well as have access to information related to the projects they lead. Finally, CAMS gives reviewers access, in a single location, to the information and documentation necessary to assess the proposals assigned to them.

## 4 ACCESS TO CAMS

The CFI liaison and account administrator are responsible for setting access privileges for all institutional administrators. Please contact them to obtain a CAMS account. If you are the CFI liaison or the account administrator for your institution, refer to section 15 (“Managing institutional agreements and access privileges”).

If you are an individual with an institutional agreement role (i.e. President, authorized signatory, liaison or account administrator), the CFI will create or update your account in CAMS. This will be done by the CFI following the receipt of a signed institutional agreement from your institution.

Following the creation of a new account, an activation email notification will be sent to the user. The account must be activated within 30 days of receipt, so please ensure that the CFI’s automated activation messages (from [notification@cfi-fci.ca](mailto:notification@cfi-fci.ca)) will not be blocked by your institution’s firewall.

### 4.1 CAMS sign-in page

Once your CAMS account is created and the appropriate privileges assigned, you can access CAMS as follows:

- Navigate to [Innovation.ca](http://Innovation.ca);
- Click “CFI online” from top of screen;
- Click “Sign in” in right-hand menu; and,
- The CAMS sign-in page will appear.

The screenshot shows the CAMS sign-in page on the Innovation.ca website. The header includes the 'INNOVATION.CA' logo and the text 'CANADA FOUNDATION FOR INNOVATION' and 'FONDATION CANADIENNE POUR L'INNOVATION'. A 'Help | Français' link is in the top right. Below the header, there's a 'Getting started with CAMS' link. The main heading is 'Welcome to the CFI Award Management System (CAMS)'. The sign-in form contains fields for 'Username (email)' and 'Password', a 'Remember me on this computer' checkbox, and a 'Sign in' button. Below the button are links for 'Forgot password?' and 'Create a new account'. At the bottom, there's a link for 'Important notices' and a copyright notice: '© Canada Foundation for Innovation, 2011'.

On this page:

- Registered users can sign in;
- Registered users who have forgotten their password can reset their password; and,
- Researchers and institutional administrators can create a CAMS account.

## 4.2 Resetting your password

The screenshot shows the 'Reset your password' page on the INNOVATION.CA website. The header includes the INNOVATION.CA logo, the text 'CANADA FOUNDATION FOR INNOVATION' and 'FONDATION CANADIENNE POUR L'INNOVATION', and a 'Getting started with CAMS' link. The main heading is 'Reset your password'. Below it is a text input field labeled 'Username (email)'. At the bottom are 'Submit' and 'Cancel' buttons.

If you have forgotten your password, you can request to have the password automatically reset by clicking “Forgot password?” on the sign-in page. You will be required to provide your username (email) and the answer to the security question in your profile. If you do not remember the answer to this question, please contact the CFI help desk at [help.aide@innovation.ca](mailto:help.aide@innovation.ca). Your temporary password will be emailed to you. Use this password to sign in to CAMS. Please note that the temporary password will expire after 30 days.

## 4.3 Accessing user profile and preferences

These pages allow you to manage your contact information and password, as well as view privacy notices from the CFI.

The screenshot shows the 'My profile and preferences' page. The top navigation bar includes 'Home', 'Demo Account (fb1@innovation.ca)', 'My profile and preferences', 'Help', 'Français', and 'Sign out'. Below the navigation bar is a breadcrumb trail 'Home > My profile and preferences'. The main heading is 'My profile and preferences'. There are three tabs: 'Update contact information' (active), 'Manage password', and 'View privacy notices'. A blue callout box with an arrow pointing to the 'My profile and preferences' link in the navigation bar contains the text 'Click here to access your profile and preferences'. The 'General information' section shows a PIN of 134021 and two input fields: 'Family name' with the value 'Account' and 'First name' with the value 'Demo'. Both fields have a '50 characters' limit indicator.

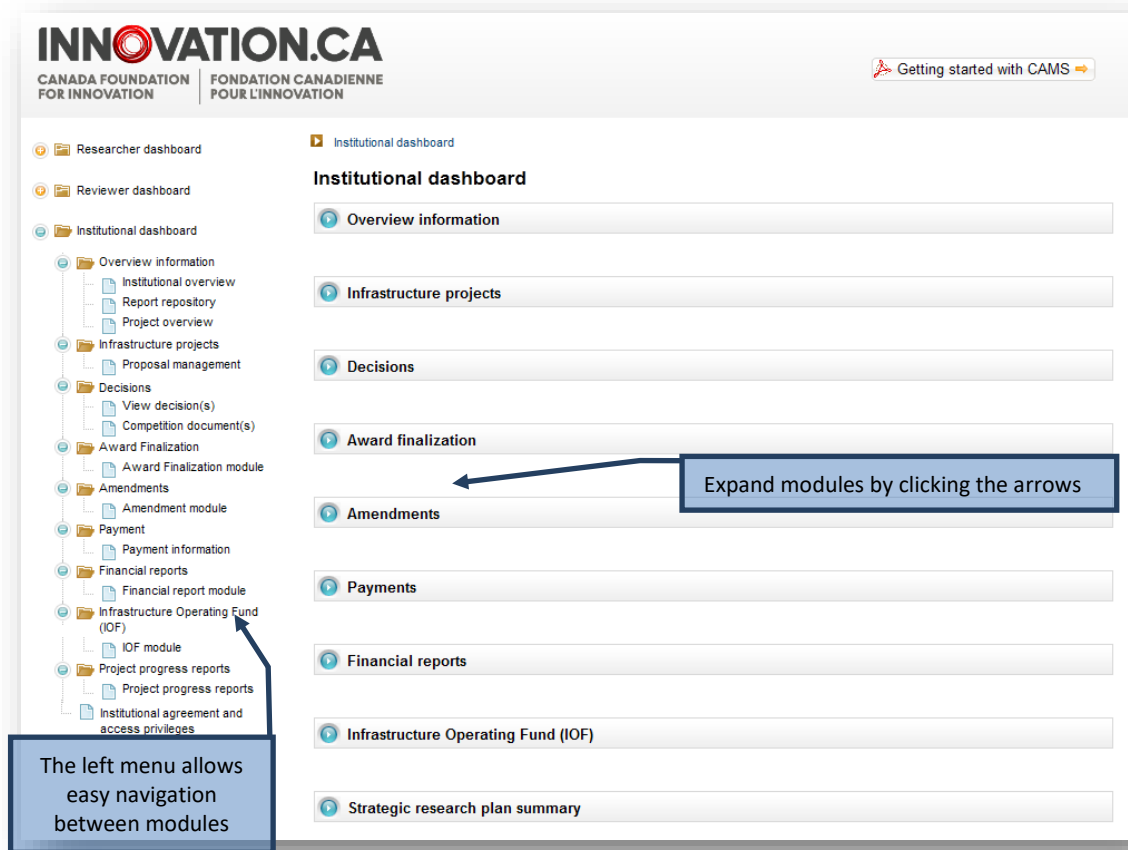

## 5 THE INSTITUTIONAL DASHBOARD

### 5.1 Overview

Once signed in as an institutional administrator in CAMS, you are automatically directed to your institutional dashboard. The information you can access is dependent on the access privileges granted to you by your institution for every module.

### 5.2 Navigation

The institutional dashboard contains a number of sections. The following image describes these sections and illustrates their functionalities.

**Note:** You may not see all the sections displayed above. The sections displayed on your institutional dashboard will depend on the access privileges associated to your account.

A number of features are available in most CAMS modules that can help you navigate between screens or provide contextual information for certain fields.

**Search results**

Budget updates subsequent to the award finalization can be viewed in the amendment section of the institutional portal.

[Export search results to Excel](#)

175 entry(ies) found, displaying 20 entry(ies)

Project number	Project leader	Project title	Fund	CFI board decision date	Date received by the CFI	Budget at award finalization	Forms/ attachments
88888	Account, Demo	An intelligent system	Innovation Fund over \$350,000	1999-06-22	1999-12-13	Itemized list	

For award finalizations prior to May 2014, the date displayed corresponds to the date the Itemized list & summary of secured contributions was submitted to the CFI.

Notice of intent

- 'Total project cost' is a required field.
- 'Amount requested from the CFI' is a required field.
- 'Primary discipline' is a required field.
- 'Primary sub-discipline' is a required field.
- 'Primary area of application' is a required field.
- 'Title/position' is a required field.

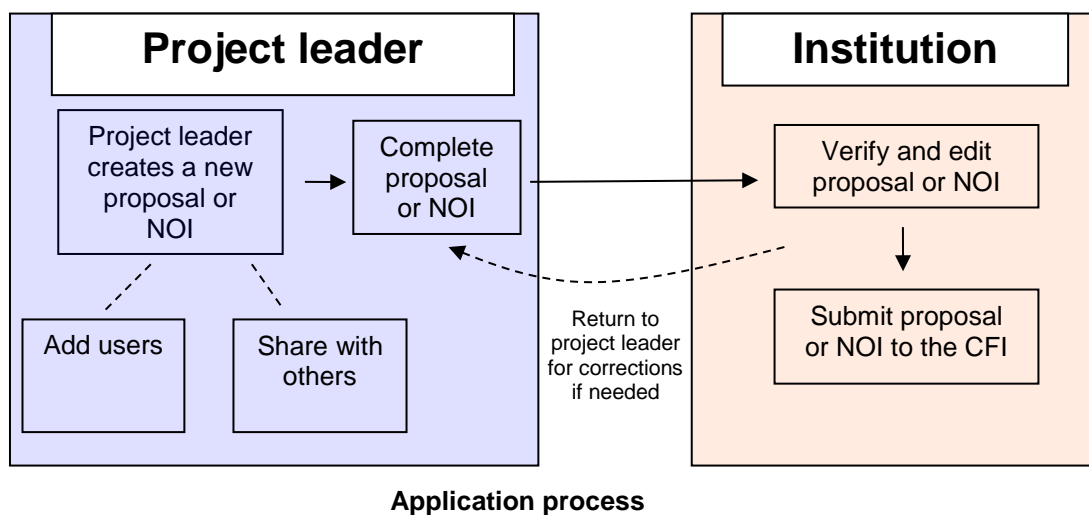

Print Close

Clicking an error in a validation window will lead you to the relevant section

## 6 THE APPLICATION PROCESS

The process to submit a Notice of Intent (NOI) or proposal to the CFI typically involves three steps:

1. The project leader creates a new NOI or proposal and completes the forms online. Once the project leader has marked the form as complete he or she will no longer have access to modify it. Institutional administrators with appropriate access can also complete the forms online on behalf of the project leader.
2. The institution may edit the form and/or return it to the project leader for revision. When the NOI or proposal is deemed final, the institution indicates that the form has been verified. The system will generate the final PDF version of the NOI or the proposal at this point.
3. An institutional administrator with submission privileges then submits the NOI or proposal to the CFI.

**Note:** For more information on the application process, refer to the specific instructions for each fund available through the “[Our funds](#)” page of the [CFI website](#).

## 6.1 Managing proposals

As an institutional administrator involved in pre-award activities, your institution may have given you access to the CAMS proposal management section. The proposal management section allows you to view the status of your institution's NOIs and proposals.

[Institutional dashboard](#) > [Infrastructure projects](#) > [Proposal management](#)

Numbers indicate the number of NOIs or proposals in that status

**Note:** Archived projects are not listed or counted in this form.

### 6.1.1 Searching

CAMS provides a search functionality to help institutional administrators locate specific NOIs or proposals. You can use this search functionality by providing a project number, or other search criteria.

[Institutional dashboard](#) > [Infrastructure projects](#) > [Proposal management](#)

#### Proposal management

Status list

Search

Project archiving

Collaboration requests

Use the search tool below to find notices of intent or proposals in which Test institution 1 EN is the applicant institution.

You can search:

- by project number; or,
- by any combination of the search criteria indicated. Results will be projects matching all criteria.

Note: Keyword searches are enabled in the project title and project leader name search fields (e.g. a search for "smith" will match "Smith", "Naismith", "Smithers", etc.).

You will be able to see the current status of projects found and display or print them directly from the search results table below. To perform additional actions (e.g. submit a proposal to the CFI), click on the link to the notice of intent or proposal, as appropriate, within the Component column.

### 6.1.2 Listing and sorting

Whether you list items by status, or search for specific projects, you will be presented with a table of results. The available actions will depend on the status of the NOIs or proposals listed. Some basic features are available on each table, including the ability to sort by column and return to the search page.

[Institutional dashboard](#) > [Infrastructure projects](#) > Proposal management

2 entry(ies) found Click Display/print to view the NOI or proposal ☐ Show all ☒ Show pages

### 6.1.3 Completing and validating forms

The status of all newly created forms in CAMS is “in progress.” Project leaders have full access to the forms to enter data. If the institution wishes to mark the form as complete on behalf of the project leader, it will be able to do so from this table. Once the form is marked as complete the project leader will no longer be able to modify it.

[Institutional dashboard](#) > [Infrastructure projects](#) > Proposal management

### 6.1.5 Verifying or returning to the project leader for corrections

Once the form has been marked as complete, the institution retains access to edit the forms and can return them to the project leader for corrections. Once the institution is satisfied that the NOI or proposal is final and ready for submission to the CFI, it must indicate this by clicking on the button in the “Verified?” column. Note: Depending on the fund, additional validation rules might apply at this stage. Run the validation to check if all required data has been entered in the form.

For NOIs and proposals that include several modules or CVs, the system will generate a complete PDF of the form by merging all components into a single file. The merged PDF will be available within two hours and will appear in the “Display/print” window. Proposals can be submitted to the CFI prior to having the merged PDF available.

[Institutional dashboard](#) > [Infrastructure projects](#) > [Proposal management](#)

☐ Show all ☒ Show pages

[Submit to the CFI](#)

In some cases, the CFI may return a NOI or proposal to your institution so that corrections can be made. These can be found in the status list (see section 6.1, “Managing proposals”).

### 6.1.7 Project archiving

At any time, an institution may decide that it will not submit a particular project or group of projects. Institutions can archive these projects to remove them from the institutional and researcher dashboards. Note that you can only archive projects if the proposal for it has never been submitted.

Archived projects can be accessed in read-only mode from the project archiving tab. Researchers may also access archived project forms from the researcher dashboard.

[Institutional dashboard](#) > [Infrastructure projects](#) > [Proposal management](#)

Drop down list will display all funds that the institution has collaborated on.

## 6.2 Guidelines for attachments

### 6.2.1 Pagination

CAMS will automatically paginate notices of intent and proposals when they are submitted. Documents *should not* be individually paginated prior to being uploaded to the electronic system.

### 6.2.2 Page formatting

Since reviewers will assess proposals electronically, the applicant should only use a standard, single-column on an 8.5" x 11" page layout for documents. Avoid using a two-column or landscape format since it may reduce legibility.

The notice of intent and proposal must be clear and easily readable. Legibility is of paramount importance and should take precedence in the selection of an appropriate font for use in the notice of intent and proposal. The applicant is strongly encouraged to use a 12-point, black-coloured font and use single line spacing (six lines per inch) with no condensed type or spacing.

Additionally, the CFI expects documents to conform to the following guidelines:

- Header: Indicate the administrative institution on the top left, the title of the section in the middle and the project number on the top right of each page.
- Footer: Do not include any information in the footer as this area will be used for automatic page numbering.
- Page margin: Insert a margin of no less than 2.5 cm (1 inch) around the page. The header may be within the margin.
- File format and size: Only PDF files may be uploaded. Documents in other formats should be converted to PDF prior to being uploaded and should not be encrypted or password protected. The file size must not exceed 20 megabytes.

Adherence to the page formatting guidelines noted above is necessary to ensure that the reviewers receive legible proposals and that no applicant will have an unfair advantage by using smaller type, line spacing or margins to provide more text in the notice of intent or in the proposal. Failure to adhere to these guidelines may result in the CFI returning a proposal for revision.

## 6.3 Notice of Intent structure

Notices of intent will be used to assist the CFI in planning the review process, identifying the requisite expertise for the assessment of each proposal, recruiting committee members, and detecting potential eligibility issues with the infrastructure items requested. Therefore, notices of intent should contain accurate information about the infrastructure and its users, the proposed research or technology development and the expected outcomes.

Applicants will not be able to change the name of the project leader or administrative institution once a notice of intent is completed. That is because the CFI uses notices of intent to assemble review committees and changes to the project leader or administrative institution may result in a conflict of interest for a review committee member. *If such a change is deemed necessary, contact your Senior Programs Officer as soon as possible. The CFI will oversee the change to be made in CAMS.*

### 6.3.1 Project information

This section captures basic information about the project such as the title, administrative institution and keywords.

### 6.3.2 Collaborating institutions

Identify the institutions eligible for CFI funding collaborating in this project. Enter the amount to be provided from each collaborating institution's envelope for this competition. Do not include in this list the administrative institution identified in the Project information section.

### 6.3.3 Principal users/Team Members

List the principal users of the infrastructure requested, including the project leader. Principal users must have a CAMS account and sign in to accept to participate in the project before a notice of intent can be submitted to the CFI. Researchers listed as principal users automatically gain read access to the notice of intent and proposal.

### 6.3.4 Project description (page limit varies by competition)

Provide a description of the major pieces of infrastructure requested, a short overview of the research or technology development activities to be enabled by the infrastructure, and the anticipated outcomes from these activities, including expected application(s).

Also use this section to clearly indicate if the proposal will include advanced research computing infrastructure. Similarly, specify if the proposed location of the infrastructure project would be either a national or international research facility. In both such cases, the institution must consult with the host facility, comply with the facility's established planning and project approval processes, and obtain the approval of the host facility.

### 6.3.5 Suggested reviewers

Identify a minimum of six reviewers who are well-qualified to review the proposal and who are not in a position of conflict of interest. A conflict of interest may be deemed to exist or perceived as such when reviewers:

- are a relative or close friend, or have a personal relationship with the project leader or one of the principal users;
- are in a position to gain or lose financially/materially from the funding of the proposal;
- have had long-standing scientific or personal differences with the project leader or one of the principal users;
- are currently affiliated with the project leader's or the principal users' institutions, organizations or companies — including research hospitals and research institutes;
- are closely professionally affiliated with the project leader or one of the principal users, as a result of having in the last six years:
  - frequent and regular interactions with the project leader or one of the principal users in the course of their duties at their department, institution, organization or company;
  - been a supervisor or a trainee of the project leader or one of the principal users;
  - collaborated, published or shared funding with the project leader or one of the principal users, or have plans to do so in the immediate future;
  - been employed by the administrative institution;
- feel for any reason unable to provide an impartial review of the proposal.

Note: The decision whether to contact the suggestions remains with the CFI.

## 6.4 Proposal structure

The proposal should clearly present the merits and excellence of the proposed project. Sufficient information should be provided to enable reviewers to evaluate the proposal in accordance with the assessment criteria established by the CFI (please refer to the Assessment criteria section for the competition).

If the submission of a notice of intent was required, CAMS automatically populates the proposal with information provided in the notice of intent including the following: project information, collaborating institutions, principal users and suggested reviewers. Applicants will not be able to change the name of the project leader or administrative institution once the notice of intent is completed. This is because the CFI uses the notices of intent to assemble review committees and a change to the project leader or administrative institution may result in a conflict of interest for a review committee member. *If such a change is deemed necessary, contact your Senior Programs Officer as soon as possible. The CFI will oversee the change to be made in CAMS.*

Applicants are able to revise the details of the collaborating institutions, principal users and suggested reviewers to reflect changes from the time of the notice of intent submission. However, we ask that you inform your Senior Programs Officer as soon as possible if any changes are made to the aforementioned lists.

The proposal consists of three separate CAMS modules:

**Project module:** Information about the proposed project, how it meets the objectives and criteria of the competition.

**Finance module:** Information pertaining to the budgetary details of the proposal.

**Suggested reviewers module:** List of potential reviewers of the proposal.

The forms in CAMS will dictate the maximum number of characters that can be included in each section and/or the page limits for uploaded documents.

## **6.5 Project module**

### **6.5.1 Project information**

This section captures basic information about the project such as the title, administrative institution and keywords. The information in this section is automatically populated with information if it was provided in a notice of intent.

### **6.5.2 Plain language summary**

Provide a short summary in plain language of the proposed project: what is being researched, how it is being done and why it is important. Focus on the expected impacts and benefits to Canada, beyond academic accomplishments. This summary will not be used in the review process. Should the project be funded, it may be used in the CFI's communications products and website.

### **6.5.3 Project summary**

In language appropriate for a Multidisciplinary Assessment Committee (MAC), provide a general description of the research or technology development activities to be undertaken and a general overview of the infrastructure being requested. This summary must concisely address the extent to which the proposal meets the competition objectives.

### **6.5.4 Principal and other users/Team members**

The list of principal users/team members is prepopulated if a notice of intent was required. Newly-added principal users must have a CAMS account and accept to participate in this project before a proposal can be submitted to the CFI. The CVs of the principal users will be appended to the proposal. Researchers listed as principal users automatically gain read access to the proposal.

### **6.5.5 Collaborating institutions**

Identify the institutions eligible for CFI funding collaborating in this project. The list of collaborating institutions should be filled out prior to completing the Finance module. The choice of infrastructure location in the Cost of individual items section of the Finance module will be populated based on this list. Do not include in this list the administrative institution identified in the Project information section.

### **6.5.6 Financial resources for operation and maintenance**

This section of the Project module captures the annual costs and sources of committed support to ensure the effective operation and maintenance of the infrastructure for the first five years after implementation.

In cases where the useful life<sup>1</sup> of some of the infrastructure items requested are longer or shorter than five years, the Assessment criteria section of the proposal should provide complementary information regarding the operating and maintenance needs for these items over their useful life.

Do not include costs related to research and/or technology development. If funding sources include the CFI Infrastructure Operating Fund (IOF), list these in the “institutional contribution” category.

### 6.5.7 Assessment criteria

Upload a PDF document that contains key information on how the proposal meets the objectives and assessment criteria for the competition. Ensure that the document follows the guidelines for attachments (Section 6.2).

Each assessment criterion will be evaluated against a standard. Each criterion includes aspects that must be addressed in the proposal. Failure to do so will weaken the proposal.

The document allows the applicant maximum flexibility to address each criterion, including the use of figures or diagrams, where appropriate. The distribution of pages among criteria is at the applicant’s discretion, up to the total page limits.

## 6.6 Finance Module

The Finance module consists of the following sections:

- Cost of individual items
- Construction or renovation plans (if applicable)
- Contributions from eligible partners
- Infrastructure utilization
- Overview of infrastructure project funding (generated automatically)

The tables in the Overview of infrastructure project funding section in CAMS will be automatically populated with information taken from the other sections of the Finance module. Note that the amount requested from the CFI is calculated based on the difference between the total contributions from eligible partners and the total eligible costs.

### 6.6.1 Cost of individual items

When completing the Cost of individual items section, the CFI recommends that the applicant bundle items into functional groupings. However, details and justification for each item within a group should be provided in addressing the infrastructure criterion in the Assessment criteria document. The CFI’s *Policy and program guide* outlines the eligible costs for infrastructure projects.

List only the eligible infrastructure acquisition and development costs. List the full cost of each item. Retain documentation (price lists, quotes, etc.) so that you can provide it to the CFI upon request.

Please note:

- If the infrastructure will be used for purposes other than research or technology development, list only pro-rated research or technology development costs.
- The total eligible costs must include taxes (net of credits received), shipping and installation. However, taxes must not be calculated on the in-kind portion.

---

<sup>1</sup> The useful life of the research infrastructure is considered to be the period of time over which the infrastructure is expected to provide benefits and be usable for its intended purpose as per the proposal, factoring in normal repairs and maintenance.

- When preparing budget estimates, the applicant must follow their existing institutional policies and procedures. Costs included in this budget must be close estimates of fair market value. Refer to the *Policy and program guide* for information on how in-kind contributions must be assessed.

### **6.6.2 Construction or renovation plans**

All proposals that include construction or renovation must provide the following information:

- A detailed breakdown of the overall cost of the construction or renovation project, categorized by cost component (i.e. direct, soft and contingency costs);
- A timeline identifying key dates for the various stages of the proposed construction or renovation;
- Floor plans of the proposed area(s), showing the location of the infrastructure and the scale of the plans for projects involving multiple rooms. The floor plans must be legible when printed in black and white on standard letter size paper (8.5" x 11").

Note: The cost breakdown, timeline and floor plans should be uploaded as a separate PDF document. These pages do not count towards the page limit for the Assessment criteria section of the proposal.

### **6.6.3 Contributions from eligible partners**

List all contributions from eligible partners. Do not include the amount requested from the CFI. Provide the partner name and type, as well as a breakdown of contributions (cash and in-kind) for each eligible partner. The applicant is encouraged to bundle all expected in-kind contributions from vendors into a single line. If partner contributions are expected but have not yet been confirmed, outline the plans for securing these funds.

### **6.6.4 Infrastructure utilization**

This section of the Finance module captures the use of the requested infrastructure for CFI-eligible and non-eligible purposes and any applicable pro-rating of costs.

## **6.7 Suggested reviewers**

The list of suggested reviewers is prepopulated using the list if one was provided in a notice of intent. You may identify additional reviewers who are well-qualified to review the proposal. Refer to Section 6.3.5 of this document for conflict of interest guidelines. The decision whether or not to contact the suggested reviewers remains with the CFI.

## 7 DECISIONS

As an institutional administrator, your institution may have given you access to the CAMS decisions module. This module allows you to view decisions related to proposals submitted to the CFI by your institution and gives you access to competition documents uploaded by the CFI.

### 7.1 View decisions

This search engine enables you to search and display subsets of decisions made by the CFI Board. Alternatively, you may click on "View all decisions" to list all decisions for your institution.

[Institutional dashboard](#) > [Decisions](#) > [View decisions](#)

**Decision**

 This search engine enables you to search and display subsets of decisions made by the CFI Board. Alternatively, you may click on the link "View all decisions" to list all decisions for your institution.

## 8 AWARD FINALIZATION

As an institutional administrator involved in post-award activities, your institution may have given you access to the award finalization module. The award finalization module allows you to view award finalization status information related to the projects at your institution, thereby helping you manage your award finalization process. The search features allow you to obtain/view lists of projects for various award finalization statuses. In addition, you can view specific project-related information such as the award agreement, the budget at award finalization, the award finalization form, and award agreement special conditions (if any).

As indicated in the institutional agreement submitted to the CFI by your institution, if you are the President, the liaison, the account administrator or an authorized signatory, you must submit the award finalization form using this module.

This section provides additional information on the award finalization module within CAMS. You should consult the [Policy and program guide](#) for complete information on requirements and guidelines related to finalizing CFI awards.

If an updated budget is required prior to finalizing the award agreement, institutions must submit an amendment using the amendment module. Refer to the next section of this guide for further information regarding the amendment module.

### 8.1 Searching

The award finalization module allows you to search for a specific project, search by project leader, or search for projects based on their current award finalization status.

The screenshot shows the 'Award finalization search' interface within the 'Institutional dashboard > Award finalization module'. The interface includes a search instruction: 'Please enter one or more search criteria to search for a specific project. Alternatively, you can select an award finalization status from the droplist (the list generated can help you manage the award finalization process)'. Below this, there are three input fields: 'Project number' (with a help icon), 'Project leader's family name', and 'Project leader's first name'. These are separated by an 'or' connector. Below the connector is an 'Award finalization status' dropdown menu with 'Please select...' as the current selection. At the bottom, there are 'Search' and 'Clear' buttons.

Institutional dashboard > Award finalization module

**Award finalization**

**Award finalization search**

Please enter one or more search criteria to search for a specific project. Alternatively, you can select an award finalization status from the droplist (the list generated can help you manage the award finalization process).

Project number

Project leader's family name

Project leader's first name

or

Award finalization status

## 8.2 Search results

Whether you search for a specific project or by award finalization status, you will be presented with a table of results listing the projects that match your search criteria. The list is by default sorted by project number ascending, but you can sort the information by clicking on most of the column headers in the table. You also have the option of exporting your search results to Excel.

The screenshot shows a web interface titled "Search results". At the top, there is an information icon and a message: "Budget updates subsequent to the award finalization can be viewed in the amendment section of the institutional portal." Below this is a link "Export search results to Excel" with an Excel icon. A blue callout box with an arrow points to this link, containing the text "Click to generate an Excel file from search results". Below the link, it says "1 entry(ies) found". A table follows with the following columns: Project number, Project leader, Project title, Fund, CFI board decision date, Award finalization form, AFF date, Award agreement (with sub-columns Special conditions and Date issued), Budget at award finalization, and Forms/ attachments. The first row of data shows: 12345, Simon, John, Calcium study, On-going New Opportunities Fund, 2010-05-30, Submitted, 2011-05-01, (empty Special conditions), 2011-06-01, Itemized list, and a "View" link. A blue callout box with an arrow points to the "View" link, containing the text "Download documentation related to the project". Below the table, it says "1 entry(ies) found".

Project number	Project leader	Project title	Fund	CFI board decision date	Award finalization form	AFF date	Award agreement		Budget at award finalization	Forms/ attachments
							Special conditions	Date issued		
12345	Simon, John	Calcium study	On-going New Opportunities Fund	2010-05-30	Submitted	2011-05-01		2011-06-01	Itemized list	<a href="#">View</a>

The search results will show you the date the award finalization form was received by the CFI, the date the award agreement was issued by the CFI and which budget was used at award finalization (itemized list<sup>2</sup>, amendment or proposal). You will also be able to view special conditions included in the award agreement and whether these have been met or not.

Finally, you will be able to view the forms and attachments related to a project such as the award finalization form, the award agreement and the budget at award finalization (in both PDF and Excel format) by clicking on "View." If applicable, you will also be able to view all revised award agreements issued for the project.

<sup>2</sup> The use of the itemized list form has been discontinued by the CFI in December 2014.

### 8.3 Submit the award finalization form

As indicated in the institutional agreement submitted to the CFI by your institution, if you are the President, the liaison, the account administrator or an authorized signatory, you must submit a PDF scan of the award finalization form to the CFI by clicking on "Submit."

**Award finalization form**

To open the Award finalization form, please click on the link below. You will be able to fill out the form, print it and have it signed by the appropriate individuals at your institution. Please then scan the signed copy and submit it to the CFI through this module.

[Award finalization form \(AFF\)](#)

## 9 AMENDMENTS

As an institutional administrator involved in post-award activities, your institution may have given you access to the amendment module. The amendment module allows you to view amendment status information related to your institution's projects, thereby helping you manage the amendment request process at your institution. The search features allow you to obtain/view lists of projects based on the project or amendment status (e.g. in progress, approved, rejected). The amendment module allows you to create, update, delete and submit amendment requests, as well as view CFI comments (if any) related to a specific amendment.

This section provides additional information on the amendment module within CAMS. You should consult the [Policy and program guide](#) for complete information on requirements and guidelines related to changes to infrastructure projects and instances where a change request must be submitted via the amendment module in CAMS.

If an updated budget is required prior to finalizing the award agreement, institutions must submit an amendment using the amendment module. This same module must be used to submit an amendment request following the finalization of an award agreement.

**Note:** Amendment requests can only be created if a final financial report has not yet been created for a project. Inversely, a final financial report cannot be created if an amendment request is in progress.

### 9.1 Searching

The amendment module allows you to search for a specific project, or to search for projects based on the project leader's name, the fund, the status of the latest amendment request or the status of the project. You can also view all projects or only projects with an amendment request.

When you search for a specific project using the project number, you will be brought directly to the project's main amendment page (see section 9.3, "Project's main amendment page").

The screenshot shows the 'Amendments' section of the CAMS system. At the top, there is a breadcrumb trail: 'Institutional dashboard > Amendment module'. Below this, the title 'Amendments' is followed by an information icon and a paragraph: 'Please enter one or more criteria to search for a specific project. Alternatively, you can view all projects or only those with amendments by clicking on one of the links below. You may also select a status/fund from the dropdown lists (the list generated can help you manage the amendment request process)'. There are two links: 'View all projects' and 'View all projects with amendments'. Below the links is a 'Search' box containing several input fields and dropdown menus. The fields are: 'Project number' (with a help icon), 'Project leader's family name', and 'Project leader's first name'. These are separated by 'or' labels. Below these are three dropdown menus: 'Fund' (with 'Please select...' text), 'Status of latest amendment' (with 'Please select...' text), and 'Status of project' (with 'Please select...' text). At the bottom of the search box are 'Search' and 'Clear' buttons.

## 9.2 Search results

When you search using family name, first name, statuses or by using “View all projects” or “View all projects with amendment requests”, you will be presented with a table of results listing the project(s) that match your search criteria. The list is by default sorted by project number ascending, but you can sort the information by clicking on any of the column headers in the table.

Click to view CFI comments on amendment request

Click to view a PDF version of the amendment request

Note that only amendment requests that relate to changes to the infrastructure will include an Excel version in addition to the PDF version. If the amendment request pertains only to a change in the project end date, only the PDF version of the amendment request will be available.

For amendments that are in progress, you will be able to run a validation (to check for errors in the amendment form) and perform various actions, depending on the status of the amendment. You can also delete an amendment request previously created but not yet submitted to the CFI.

[Institutional dashboard](#) > [Amendment module](#) > Project amendment(s): Project # 34063

[Return to search page](#)

 The amendment request should be used to request changes requiring prior CFI approval. All other changes to the infrastructure from what was initially described in the proposal must be described in the final financial report.

Changes requested in amendment requests will be reflected in future financial reports once they have been approved by the CFI.

Click "Run" to perform a validation of the information entered in the form

Select a value to perform an action

Click "Open" to access the amendment request form

Click to delete the amendment request

## 9.4 Amendment requests: statuses and actions

\*In some cases, the CFI may return an amendment request to your institution so that corrections can be made.

The status of all newly created amendment requests in CAMS is “in progress.” The amendment requests can be created only by institutional administrators with appropriate access. They can then be accessed by the project leader if institutional access has been granted.

If given access, and once a project leader has finished entering data in the amendment request, he/she will be required to confirm that the form is complete. Once this is done, he/she will no longer have access to modify it.

Note that completion of the amendment request by a project leader is not a mandatory step. An institutional administrator with the appropriate privileges can fill in the form and set its status as verified, even if project leaders have been granted access to the amendment module.

You will then verify the amendment request and set the status as verified. If changes are required, you can also return the amendment request to the project leader so that he/she can make the appropriate changes.

Once an amendment request has been set as verified, it can be reopened to make additional changes. If no further changes are required, the amendment request can be submitted to the CFI. No further changes are possible at this point, and the status of the amendment request changes to “submitted to the CFI.”

The CFI will approve, reject or return the amendment request to your institution for corrections. Note that it is possible to delete an amendment request at any stage in the process, except after it has been submitted to the CFI.

## 9.5 Amendment request form

The amendment request form consists of six tabs. When an amendment request is first opened, the default tab is the “Overview” and the other tabs are not accessible. You will first need to indicate the nature of your change (i.e. change to the end date of the project or change to the infrastructure, including new items, or both). This will determine which tabs will become available and need to be filled out. The last tab allows you to attach up to three documents (PDF format) to further explain changes made to the project.

The screenshot shows the 'Overview' tab of the amendment request form. The breadcrumb trail at the top reads: 'Institutional dashboard > Amendment module > Project amendment(s): Project # 34063 > Amendment request #1 > Overview'. A 'Return to project page' link is on the left. A blue box with an arrow points to the tabs, stating 'Use tabs to navigate through the sections'. The tabs are: 'Overview' (active), 'Change to end date', 'Change(s) to infrastructure', 'Eligible costs', 'Contributions', and 'Attachments'. A blue box with an arrow points to the 'Attachments' tab, stating 'Append files in the “Attachments” tab'. Below the tabs, an information icon and text state: 'Amendment requests should be used by institutions to request changes requiring prior CFI approval.' Buttons for 'Display/Print' and 'Save' are on the right. The form fields include: 'Amendment number 1', 'Institution Test inst (300)', 'Fund Innovation Fund', 'Project number 34063', 'Date of award agreement', 'Project leader Account, Demo', 'Project end date', and 'Project title Infrastructure for breakthrough research'. Below these is a text field for 'Prepared by' with the value 'Demo Account' and a 60-character limit. A section titled '\* Please indicate the nature of your change (select all that apply)' contains two checked checkboxes: 'Change in the end date of the project' and 'Change to the infrastructure, including new items'. A blue box with an arrow points to these checkboxes, stating 'Selecting nature of change will enable relevant sections (tabs)'. Another blue box with an arrow points to the 'Display/Print' button, stating 'Click “Display/print” to access the PDF version of the amendment request form'. A final blue box with an arrow points to the 'Save' button, stating 'Save changes before navigating to other sections (tabs)'. A bottom 'Display/Print' and 'Save' button pair is also visible.

## 10 PAYMENT

As an institutional administrator involved in post-award activities, your institution may have given you access to the payment module. The payment module allows you to view payment information related to an infrastructure project or the IOF. You can also view payment information by transaction date or for a specific period for all projects. Finally, payment information can be viewed by type or status.

### 10.1 Searching

The payment module allows you to search at either a detailed level or at a summary level.

Searching at a detailed level will allow you to view individual payment transactions. You can use various search criteria such as project number, transaction date, payment type, payment status or a combination of these. You also have the option of displaying only IOF payments.

The screenshot shows a web interface for "Payment information". At the top, there is a breadcrumb trail: "Institutional dashboard > Payment information". Below this, the title "Payment information" is followed by an information icon and a paragraph explaining that users can view payment information at either a detailed or summary level by clicking on the appropriate tab. Two tabs are visible: "Details" (selected) and "Summary". Below the tabs is a "Search" section. It contains an information icon and a paragraph explaining the search criteria: "Please enter one or more search criteria below. If searching by transaction date, the period entered must not exceed ten years. As well, if searching for all payment types or for all payment statuses, you must enter at least one other search criteria. Search results will be displayed at a transaction level." Below this, there is a note: "Note that if you search by transaction date with no other filter, search results will include both infrastructure and IOF payment details (when applicable)." The search form includes a "Project number" input field with a help icon, followed by "or" and a checkbox labeled "Display only IOF payments". Below this is the "Transaction date" section with "from" and "to" input fields, each with a calendar icon. At the bottom of the search section are two dropdown menus for "Payment type" and "Payment status", both with "Please select..." as the default value. Finally, there are "Search" and "Clear" buttons.

[Institutional dashboard](#) > [Payment information](#)

### Payment information

You can view payment information at either a detailed or a summary level, by clicking on the appropriate tab below.

**"Details" tab:** will generate search results at a transaction level (i.e. a different row for each transaction). Note that only projects that have received a payment from the CFI will be displayed in the search results.

**"Summary" tab:** will generate search results at a summary level by project, which can then be drilled down to the transaction level. Note that all projects for which an award agreement is in place will be displayed in search results.

**Details** **Summary**

#### Search

Please enter one or more search criteria below. If searching by transaction date, the period entered must not exceed ten years. As well, if searching for all payment types or for all payment statuses, you must enter at least one other search criteria. Search results will be displayed at a transaction level.

Note that if you search by transaction date with no other filter, search results will include both infrastructure and IOF payment details (when applicable).

## 11 FINANCIAL REPORTS

As an institutional administrator involved in post-award activities, your institution may have given you access to the financial report module. The financial report module allows you to view financial report status information related to a project, thereby helping you manage the financial reporting process at your institution. The search features allow you to obtain lists of projects by financial report status or type (e.g. in progress, submitted, approved, interim, final). The financial report module allows you to create, update, delete and submit financial reports, as well as view CFI comments (if any) related to a specific financial report.

This section provides additional information on the financial report module within CAMS. You should consult the [Policy and program guide](#) for complete information on requirements and guidelines related to the financial reporting process.

### 11.1 Searching

The financial report module allows you to search for a specific project (using project number or project leader name), or to search for projects based on the status of the latest report created or the financial report type. You can also view the information for all projects or view a list that includes information of the next report due for each project.

When you search for a specific project using the project number, you will be brought directly to this project's main financial report page (see section 11.3, "Project's main financial report page").

[Institutional dashboard](#) > Financial report module

### Financial reports

 This screen allows you to perform the following searches:

1. Click on the "View reports to be submitted" link for a list of the next report due for each of your projects.
2. Click the "View all projects" link for status information of the latest financial report created for each of your projects. You can then drill down to financial report project level details, including PDFs and status information by clicking on the related project number link.
3. Enter a project number for the list of financial reports created and the related PDFs and status information for that project.
4. Enter a project leader name or select a financial report status and/or type from the droplists to view the status information of the latest financial report created for each of the related projects. You can then drill down to the financial report project level details, including PDFs and status information by clicking on the related project number link.

Note that only projects that have received a payment from the CFI will be displayed in the search results.

## 11.4 Financial report statuses

Once a financial report is submitted to the CFI, the CFI will assign one of the following statuses to the report:

- **Approved:** the financial report has been reviewed by the CFI and approved. No further action is required from your institution.
- **Returned to institution for corrections:** the financial report has been reviewed by the CFI but corrections are required. You will need to view the CFI comments for this report, make the appropriate corrections, and re-submit the report to the CFI.
- **Issue pending:** the financial report has been reviewed by the CFI but there is an issue pending that requires follow-up by your institution. You will need to view the CFI comments for this report and address the issue described.
- **Submitted to the CFI — no CFI action required:** In some cases, your institution may choose to create a financial report even if one is not required by the CFI. In those cases, the CFI will not review the financial report and will indicate that no CFI action is required. Please note that this status only applies to interim financial reports.

## 11.5 Financial report form

When you create a financial report for a project, you will first need to indicate whether the report is an interim report or a final report for the project. Depending on your answer, the appropriate form (i.e. interim financial report or final financial report) will be created.

The interim financial report form consists of five tabs. When an interim financial report is first opened, the default tab is the "Overview," which is a read-only section and is provided for your reference only. Each of the three tabs, "Eligible costs," "Contributions" and "Changes," needs to be filled out by your institution. The fifth tab, "Summary," is read-only and is updated every time information is entered in the "Eligible costs" or the "Contributions" tab.

Use tabs to navigate through the sections

Click "Display/Print" to access the PDF version of the financial report form

**Eligible costs**

*i* In this section, you must enter the most recent forecast of total expenditures for the project (i.e. actual costs to date plus most recent forecast of remaining expenditures to complete the project). You must also enter the actual costs, and the forecasted expenditures for the next two periods.

Display/Print Save

Period ending 2015-03-31

Display/Print Save

Save changes before navigating to other sections (tabs)

The final financial report form also consists of five tabs. When a final financial report is first opened, the default tab is the “Overview.” You will need to indicate whether or not this project is a multi-institutional project. Each of the four tabs, “Eligible costs,” “Contributions,” “Changes” and “Certification,” needs to be filled out by your institution. The “Changes” tab also contains a section where you can attach a document (PDF format) to further explain changes made to the project.

The screenshot shows a web-based form titled "Final financial report" with five tabs: "Overview", "Eligible costs", "Contributions", "Changes", and "Certification". The "Overview" tab is active. It contains an information icon and a note: "Please fill out each of the five tabs in the order that they are presented. After the initial data entry, you may return to modify information in any of these tabs, if required." Below this, there are two buttons: "Display/Print" and "Save". The form fields are organized into a table-like structure. The first section contains "Institution" (My institution), "Fund" (Leaders Opportunity Fund - Funding for infrastructure associated with a Canada Research Chair), "Project number" (99999), "Date of award agreement" (2013-03-28), "Project leader" (Smith, John), and "Actual project end date" (2014-10-15). The "Project title" is "Leading-edge biology equipment". The second section contains "Maximum CFI contribution per award agreement" (\$93,400), "CFI payments to date (net of holdback)" (\$83,400), and a question "Is this a multi-institutional project?" with a dropdown menu showing "Please select...". At the bottom right, there are "Display/Print" and "Save" buttons.

<b>Is this a multi-institutional project?</b>	Please select... ▼

## 12 PROJECT PROGRESS REPORT

As an institutional administrator involved in post-award activities, your institution may have given you access to the *Project progress report* (PPR) module. The PPR module allows you to view the infrastructure operational statuses and PPR submission statuses related to the projects at your institution, thereby helping you manage the PPR reporting process at your institution.

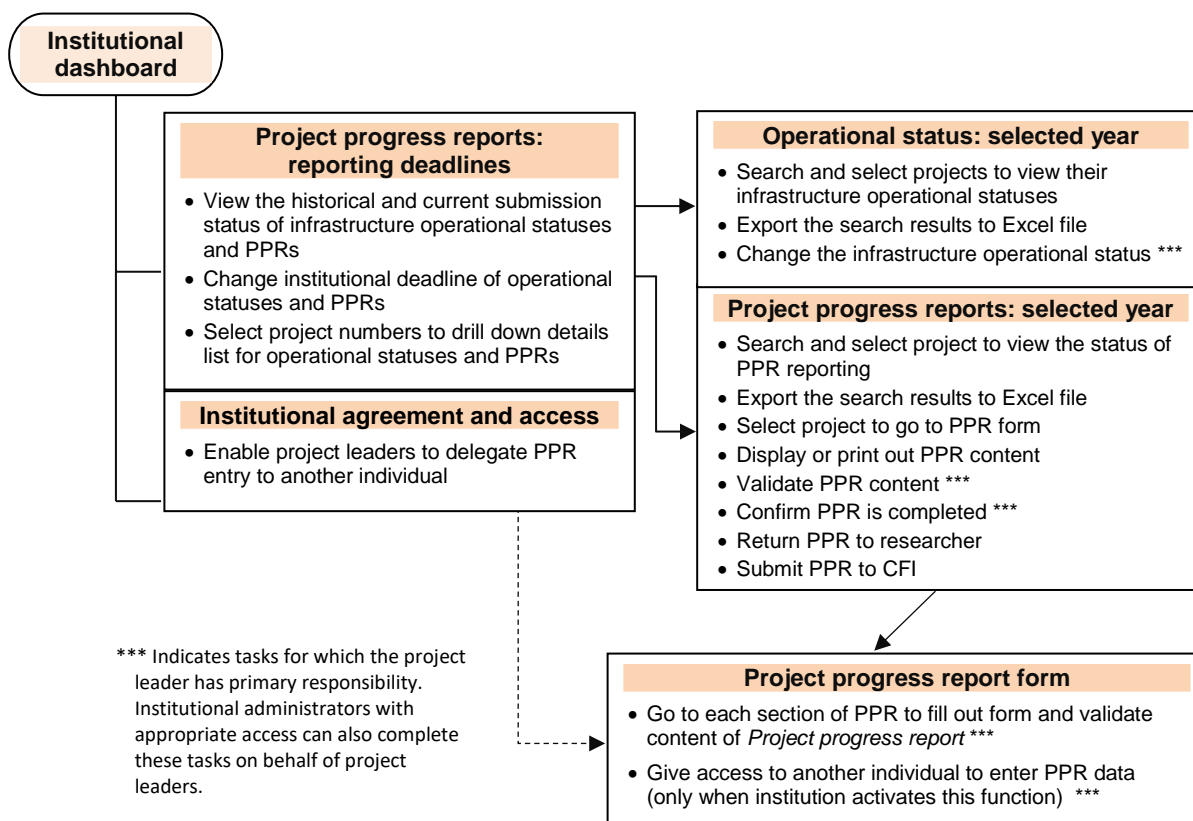

This section provides additional information on the PPR module within CAMS. You should consult the *Policy and program guide* for information on requirements and guidelines related to completing the PPR.

The process to submit a PPR to the CFI typically involves three steps:

1. The project leader indicates infrastructure operational status online (if applicable). Institutional administrators with appropriate access can also indicate operational status online on behalf of the project leader.
2. The project leader fills out, validates, and completes the PPR.
3. The institution may edit the PPR and/or return it to the project leader for revision. An authorized institutional administrator submits the PPR to the CFI.

Although completion of the PPR is under the responsibility of the project leader, a delegation tool allows her/him to share access to the online form with another individual with a CAMS account to support data entry.

The graphic below depicts the overview of CAMS PPR modules and associated tasks for institutions.

## 12.1 Operational statuses and PPR submissions: reporting deadlines

The summary table indicates annual requirements and the latest submissions for infrastructure operational statuses and the PPRs. From this list, you will be able to drill down to the page in the selected year to manage operational statuses and the PPRs. You will be able to set the institutional deadlines if applicable.

[Institutional dashboard](#) > [Project progress reports](#)

### Project progress reports: reporting deadlines

 The table below displays the CFI deadline that applies to submitting both infrastructure operational status and project progress reports. Through this screen, you can create an earlier, internal report deadline for your institution. To see a more detailed list of projects, click on the links provided in the "Operational status" and "Project progress reports" columns. To modify your internal deadlines for the current year, select the fields under 'Institution deadlines', choose new dates and click on the 'Save institution deadlines' button at the top of the table. These deadlines will be displayed to all project leaders that have a report due for the year. Refer to the [Instruction manual for completing project progress reports](#) for further guidance.

Click to access detailed annual listings of operational status/PPRs expected (submitted)

## 12.2 Managing required operational statuses

The detailed listing of operational statuses for the current year allows institutional administrators with appropriate access to view, set or change the operational statuses of projects on behalf of the project leaders. Four different statuses can be displayed under the “Infrastructure operational” column:

- **Status not submitted yet:** Infrastructure operational status needs to be reported.
- **Operational (FFR submitted):** PPR will be required in the next reporting period following final financial report (FFR) being submitted.
- **Operational:** PPR is due in the current reporting period.
- **Not yet operational:** PPR is not required this year unless the status is changed to operational. The status can be changed to operational any time before the institutional deadline indicated.

[Institutional dashboard](#) > [Project progress reports](#) > [Operational status: 2016](#)

### Operational status: 2016

This screen lists all projects for which the infrastructure operational status should be provided in the year selected. Through the researcher portal, project leaders are asked to indicate whether the CFI-funded infrastructure is operational to the extent that they have been able to initiate the research activities described in the CFI proposal.

Through the table below, institutional users are also able to respond in the “Operational status” column on behalf of project leaders. Once the status becomes “Operational” through the submission of a positive response to the Operational status question or by the way of a submitted final financial report, a reporting schedule will be generated and Project progress reports will be required annually until completion.

**Filter the listing based on operational status**

Operational status:  Institutional deadline: 2016-06-30 CFI deadline: 2016-06-30

**Once it is set as operational, it is irreversible**

**“Not yet operational” can be changed to “Operational” any time before institutional deadline**

## 12.3 Filling out, validating and completing PPR

The statuses of all newly created PPRs in CAMS are shown as “in progress.” Project leaders have full access to the PPR form to enter, validate data and complete the PPR. Institutional administrators with appropriate access can also enter, validate and complete the forms on behalf of the project leader..

[Institutional dashboard](#) > [Project progress reports](#) > Project progress reports: 2016

### Project progress reports: 2016

This screen lists all projects for which Project progress reports are due in the year selected, and allows you to take actions such as printing, validating, and submitting progress reports. Note that if you make changes to a report after it has been completed, you will need to run validation prior to submitting to the CFI. Only reports with a status of 'Completed' can be submitted to the CFI.

## 12.5 Returning PPRs to project leaders or submitting PPRs to CFI

Once the form has been marked as “complete,” the project leader will no longer be able to modify the PPR. The institution retains access to edit the forms and can return them to the project leader for corrections as needed. Once the institution ensures that the PPR is completed and ready for submission, an authorized institutional administrator may submit one or more PPRs to the CFI.

Once the PPR has been submitted to the CFI, the institution will no longer be able to edit the forms.

[Institutional dashboard](#) > [Project progress reports](#) > Project progress reports: 2016

### Project progress reports: 2016

Select one or more projects to submit their PPR

## 12.6 Enabling project leaders to delegate PPR data entry

An institution can grant project leaders to delegate PPR entry to another individual who has a CAMS account. Data entry privileges of the designated individual are limited to PPR forms only and must be re-created every year.

To manage access levels for project leaders, refer to section 15.3, “Access levels for project leaders”.

**Note:** The project leader and institution will still be responsible for the PPR “complete” and “submit” functions through their CAMS dashboards, and for ensuring the completeness and accuracy of the data entered in their PPRs. The delegate will NOT have the ability to set the PPR as “complete.”

## 12.7 Delegating completion of the PPR

Project leaders can give access to someone with a CAMS account to enter data in their project progress report. Institutional administrators with appropriate access can also delegate entry on behalf of the project leader.

### Project progress report delegation

This feature enables you to give access to someone to enter data in your project progress report. **The project leader continues to have responsibility** for ensuring the data is accurate and complete. You may only delegate data entry to one person at a time. This person must have a CAMS account.

Note: The delegate will **not** have the ability to set the report as "Complete". This action must be carried out by the project leader or an authorized member of the institutional research office.

## 13 INFRASTRUCTURE OPERATING FUND MODULE

As an institutional administrator involved in post-award activities, your institution may have given you access to the Infrastructure Operating Fund module. The Infrastructure Operating Fund (IOF) module allows you to view the details of your institution's IOF allocation and adjustments (if any), as well as IOF payment information. It also allows you to create, update, delete and submit IOF annual reports, as well as view the status and CFI comments (if any) related to an IOF annual report.

This section provides additional information on the IOF module within CAMS. You should consult the *Policy and program guide* for complete information on requirements and guidelines related to the IOF.

[Return to IOF module](#)

**Infrastructure Operating Fund annual report**

 In the upper table, enter the actual expenditures incurred during the period covered by this report. In the lower table, enter the expenditures you expect to incur in the period following the "period ending" of this report. IOF payments for the current year will be based on forecasted expenditures presented in this report and the cumulative CFI excess payment or shortfall. Please refer to the CFI Policy and program guide for more information on how the IOF payment schedule will be established. Please note that the institution should only report the operating and maintenance expenditures for which it is requesting funding from the CFI.

**Certification**

We certify that:

- The information provided in the IOF annual report is accurate.
- Expenditures included have not been claimed for reimbursement from another source.
- Actual expenditures reported have all been incurred in the period April 1, 2014 to March 31, 2015. Outstanding commitments included in actual expenditures consists only of expenditures that were incurred in this period, but for which the invoice was paid subsequently.
- Actual and forecasted expenditures reported are eligible costs as per the CFI Policy and program guide.
- Actual and forecasted expenditures reported are related to infrastructure projects which are admissible under the IOF, as per the CFI Policy and program guide.
- Actual and forecast expenditures reported were and will be subject to the institution's usual tendering and purchasing policies and procedures.
- All confirmations have been obtained from project leaders to attest that the infrastructure for which IOF is being requested is still used for research purposes.
- The forecasts presented are realistic and take into consideration the most recent information at the time the IOF annual report was submitted.
- Infrastructure for which IOF is requested is expected to be used for research purposes in the upcoming year.
- The administration of the funding received/requested has/will be in accordance with the Institutional Agreement, the CFI Policy and program guide and the IOF award agreement regarding the use of Infrastructure Operating Funds.

☐ I have read, understood and agree with the above.

## 14 OVERVIEW INFORMATION

As an institutional administrator involved in managing CFI-funded projects, your institution may have given you access to the institutional overview, report repository and/or the project overview.

### 14.1 Institutional overview

The institutional overview will allow you to view important institutional information on one screen, such as:

- Summary information related to proposals and awards;
- Summary information related to the IOF (IOF allocation, payments, award agreement, annual report);
- Summary information related to financial reports, amendment requests and *Project progress reports* to help the institution identify action items (e.g. in progress, reports due, reports returned to the institution for corrections, payments on hold, projects past end dates); and,
- Your institution's strategic research plan.

### 14.2 Report repository

The report repository provides access to information in Excel format that is specific to your institution and that can be used to facilitate data analysis, project monitoring and other institutional activities.

### 14.3 Project overview

The project overview will allow you to view important summary information related to one project in one screen, such as:

- Approved budget and amendment requests;
- Award finalization form;
- Award agreement and special conditions (if any);
- Summary payment and expenditure information; and,
- Summary reporting information (e.g. latest financial report, *Project progress reports*).

## 15 MANAGING INSTITUTIONAL AGREEMENTS AND ACCESS PRIVILEGES

The institutional agreement and access privileges module is only accessible if you are the President, the liaison or the account administrator, as indicated in the institutional agreement submitted to the CFI by your institution. It allows you to view the institutional agreements submitted to the CFI by your institution, and the list of individuals that have designated institutional agreement roles. It also allows you to manage the CAMS access privileges for institutional administrators and project leaders.

A video highlighting the various functions available in this module is also available on the [CFI website](#).

## 15.1 Institutional agreement

The “institutional agreement” tab allows you to view the institutional agreements submitted to the CFI by your institution, and the list of individuals that have designated institutional agreement roles.

**Researcher dashboard**

- Institutional dashboard
  - Overview information
  - Infrastructure projects
  - Decisions
  - Award Finalization
  - Amendments
  - Payment
  - Financial reports
  - Infrastructure Operating Fund (IOF)
  - Project progress reports
  - Institutional agreement and access privileges**

**Institutional dashboard**

### Institutional agreement and access privileges

The “institutional agreement” tab allows you to view the institutional agreements submitted to the CFI by your institution, and the list of individuals that have designated institutional agreement roles.

The institution can also manage the CAMS access privileges for institutional administrators and project leaders by clicking on the appropriate tab below.

Only the president, the account administrators and/or the liaison can manage or modify privileges assigned to the other institutional administrators and project leaders.

**Institutional agreement** | Privileges | Project leader access

#### Signed institutional agreements

The following institutional agreement(s) were received and processed by the CFI. The institution must inform the CFI as soon as possible of any changes to the president, designated authorized signatories, account administrator and/or liaison by submitting a revised institutional agreement.

Upon receiving a signed institutional agreement, the CFI will update or create respective accounts in CAMS. Privileges will be assigned according to the responsibilities and privileges indicated in the institutional agreement. At minimum, read-only access to all modules will be granted automatically to the account administrator, liaison, and authorized signatories.

Received date	Published date	Display/print
2016-04-21	2016-04-22	<a href="#">View</a>

#### Institutional agreement roles

The following individuals have been assigned the roles below as per the latest institutional agreement submitted to the CFI. Click on “Manage” to view or modify the privileges assigned to each individual.

As per the institutional agreement, note that each role has minimum privileges that cannot be revoked in CAMS. To view the minimum privileges for each role, click on the “View minimum privileges for each role” link.

[View minimum privileges for each role](#)

Role	Name	Username	Account status	Privileges
President	Banks, Mary	mary@myinstitution.ca	Account confirmation required by user	<a href="#">Manage</a>
Liaison	Hasselhoff, David	David@myinstitution.ca	Active	<a href="#">Manage</a>
	Kerth, Paul	paul@myinstitution.ca	Active	<a href="#">Manage</a>
Authorized signatory	Advani, Patricia	patricia@myinstitution.ca	Account confirmation required by user	<a href="#">Manage</a>
Account administrator	Davis, Tom	tom@myinstitution.ca	Active	<a href="#">Manage</a>

Click to navigate to the ‘Institutional agreement and access privileges’ section

View electronic copies of institutional agreements submitted to the CFI

View minimum privileges associated to each role

Click to add or remove additional privileges

Upon receiving a signed institutional agreement from the institution, the CFI will update or create respective accounts in CAMS for the individuals who have designated institutional agreement roles (i.e. President, authorized signatory, liaison and account administrator). Privileges will be assigned according to the responsibilities and privileges indicated in the institutional agreement. Note that these individuals have minimum privileges that are automatically assigned to them in the institutional agreement and that cannot be revoked.

Appendix A – Minimum privileges describes the minimum privileges automatically assigned by the CFI and the ones that can be modified for each institutional agreement role. If needed, you can modify certain privileges for these individuals by clicking the “Manage” link.

**Note:** The institution must inform the CFI as soon as possible of any changes to the President, designated authorized signatories, account administrator and/or liaison by submitting a revised institutional agreement to the CFI senior programs officer responsible for your institution.

## 15.2 Manage privileges

The “Privileges” tab allows you to assign and revoke access privileges for institutional administrators, whether they have an institutional agreement role or not. The liaison and account administrator are responsible for setting appropriate access privileges for institutional administrators with no institutional agreement role in accordance with institutional control framework and practices.

**Search for institutional administrators**

Please enter one or more search criteria to search for a specific individual at your institution. You will then be able to manage the access privileges for this individual by clicking on the “Manage” link in the search results table.

If an individual is not found in CAMS, click on the “Create a new CAMS account” link below to create a new CAMS account for this individual.

**Notes:**

- The “Amendment – data capture and submit” privilege can only be assigned to individuals with an institutional agreement role.
- The “Proposal – data capture and submit” privilege can be assigned to all individuals with an institutional agreement role and ONE additional individual (if necessary).

Certain privileges can only be assigned by individuals that have a specific institutional agreement role. To view the privileges that each institutional agreement role can assign, click on the “View privileges that can be assigned by each role” link.

If an individual is no longer working at your institution, please do not forget to remove his/her privileges in CAMS.

[View privileges that can be assigned by each role](#)

First name: tom

Family name:

Username (email):

[Click to access the account creation page](#)

[Create a new CAMS account](#)

[Export list of all institutional administrators with privileges](#)

[Click to export a list of all institutional administrators with privileges](#)

1 entry(ies) found

Name	Username	Account status	Privileges	History
Davis, Tom	tom@myinstitution.ca	Active	<a href="#">Manage</a>	<a href="#">View</a>

1 entry(ies) found

**Note:** Some privileges can only be assigned to a limited number of individuals:

- For amendments, data capture and submit can only be assigned to individuals with an institutional agreement role.
- For proposals, data capture and submit can only be assigned to individuals with an institutional agreement role and **ONE** additional individual (if necessary).

All other privileges can be assigned to an unlimited number of individuals.

From this screen you can create a new CAMS account for institutional administrators who do not yet have one.

As well, some privileges can only be assigned by either the liaison or the account administrator. These limitations are described in Appendix B – Privileges that can be assigned by each institutional agreement role.

Since the institution is responsible for privilege delegation and its impact on data access and integrity, CAMS accesses and privileges for all institutional administrators should be reviewed on a regular basis to ensure that they remain appropriate. You can obtain a list of all institutional administrators and their privileges in CAMS.

You can search for an individual by first name, family name or username (email). If no results are found, you will need to create a CAMS account for the individual (refer to section 0, "

Setting individual privileges”).

Note that this module must not be used to create new accounts for project leaders. Project leaders can create new CAMS accounts online. Their access levels related to post-award modules can be set in CAMS by the CFI liaison or the CFI account administrator (refer to section 0, “

Access levels for project leaders”).

### 15.2.1 Search results

You will be presented with a table of results listing the individuals that match your search criteria.

The diagram illustrates a table of search results with two callout boxes. The first callout box, labeled "Click to add or remove privileges from this user", points to the "Manage" link in the "Privileges" column. The second callout box, labeled "Click to view this a detailed history of privileges for this user", points to the "View" link in the "History" column.

Name ▲	Username	Account status	Privileges	History
Davis, Tom	tom@myinstitution.ca	Active	<a href="#">Manage</a>	<a href="#">View</a>

### 15.2.2 Setting individual privileges

You can assign different access privileges for every CAMS module and will generally be able to choose from the following access privileges:

- Read only
- Data capture (no submission capabilities)\*
- Data capture and submit \*

\* Available only for modules that involve the completion and submission of forms and reports.

The screenshot shows the 'Privileges' tab in the CAMS system. At the top, there are three tabs: 'Institutional agreement', 'Privileges' (selected), and 'Project leader access'. Below the tabs, there is a link 'Go to "Search for institutional administrators"' and a button 'Click to revoke a privilege from this account'. The main section is titled 'Manage privileges for the selected individual'. It displays the individual's details: First name: Tom, Family name: Davis, CAMS username: tom@myinstitution.ca, CAMS account status: Active, and Institutional agreement role: Account administrator. Below this, there is a 'Select privilege to assign:' dropdown menu with a list of privileges. A blue box with an arrow points to the 'Assign' button and the dropdown menu, with the text 'Click to assign the selected privilege'. Another blue box with an arrow points to the 'Revoke' column of the table, with the text 'Click to revoke a privilege from this account'. The table has two columns: 'Privilege' and 'Revoke'. The 'Revoke' column contains 'X' icons for each privilege listed. The privileges listed are: Amendment – Data capture, Amendment – Data capture and submit, Award Finalization – Read-only, Financial report – Read-only, Infrastructure operating fund – Read-only, Project progress report – Data capture, Project progress report – Data capture and submit, Proposal – Data capture, Proposal – Data capture and submit, Infrastructure operating fund – Data capture and submit, Institutional overview – Read-only, Institutional privilege management, Payment – Read-only, Project overview – Read-only, Project progress report – Read-only, and Proposal – Read-only.

Privilege	Revoke
Amendment – Data capture	X
Amendment – Data capture and submit	X
Award Finalization – Read-only	X
Financial report – Read-only	X
Infrastructure operating fund – Read-only	X
Project progress report – Data capture	X
Project progress report – Data capture and submit	X
Proposal – Data capture	X
Proposal – Data capture and submit	X
Infrastructure operating fund – Data capture and submit	X
Institutional overview – Read-only	X
Institutional privilege management	X
Payment – Read-only	X
Project overview – Read-only	X
Project progress report – Read-only	X
Proposal – Read-only	X

**Note:** If an individual is no longer working at your institution, please do not forget to revoke his/her privileges in CAMS. If the responsibilities of an institutional administrator changes, you may need to modify his/her access privileges.

### 15.2.3 History

You can view the history of the changes made to an individual's privileges (e.g. dates of changes and author of the change).

Privilege history

Below you will find a history of operations performed on the selected individual's privileges.

First name:

Tom

Family name:

Davis

CAMS username:

tom@myinstitution.ca

Date	Author	Action	Privilege

2016-04-22 17:02	paul@myinstitution.ca	Revoke	Proposal – Data capture
2016-04-22 17:02	paul@myinstitution.ca	Revoke	Proposal – Data capture and submit
2016-04-22 16:59	paul@myinstitution.ca	Assign	Proposal – Data capture and submit
2016-04-22 16:57	paul@myinstitution.ca	Assign	Proposal – Data capture
2016-04-22 16:46	paul@myinstitution.ca	Assign	Project progress report – Data capture and submit
2016-04-22 16:32	CFI	Assign	Amendment – Read-only
2016-04-22 16:32	CFI	Assign	Institutional overview – Read-only
2016-04-22 16:32	CFI	Assign	Proposal – Read-only
2016-04-22 16:32	CFI	Assign	Award finalization – Submit

Close

### 15.3 Access levels for project leaders

Project leaders must create their own CAMS accounts online. When creating an account, the project leader will automatically be given access to the Curriculum vitae, the application and the decision modules in CAMS.

The liaison and account administrator can grant project leaders access to perform any or all of the following actions in relation to the project(s) for which they are the designated project leader:

- View award finalization information (e.g. status, award agreement, budget at award finalization, CFI conditions);
- View amendment information (e.g. status, amendment in progress or submitted, CFI comments) and complete amendment requests for internal submission to the institution;
- View financial report information (e.g. status, financial reports in progress or submitted, CFI comments);
- View payment information and associated CFI comments; and,
- Delegate PPR data entry to one other individual.

**Note:** The access level option (“Yes” or “No”) selected for each of the modules will apply to all project leaders at the institution, as this cannot be customized at the individual project leader level.

Institutional agreement Privileges **Project leader access**

**Manage project leaders' accesses**

 Please indicate whether project leaders at your institution should be given access to the following modules for their projects.

Note: These permission levels will be applied to all project leaders at your institution.

Click to allow or deny project leader access to each module

Module	Access level	Access to project leaders
Award finalization	No access	<input type="radio"/> Yes <input checked="" type="radio"/> No
Amendments	Data capture	<input checked="" type="radio"/> Yes <input type="radio"/> No
Payments	Read-only	<input checked="" type="radio"/> Yes <input type="radio"/> No
Financial reports	No access	<input type="radio"/> Yes <input checked="" type="radio"/> No

 Enabling this option will allow project leaders from your institution to delegate PPR data entry to one other individual who has a CAMS account. Once you have enabled delegation for your institution, this will be the default setting for future years unless you turn this feature off.

Note: If delegation is turned on and then subsequently disabled, any delegation relationships created while delegation was enabled will remain active until the reporting year is closed. Any pre-existing delegation will remain active even if you select “No”.

Module	Allow project leaders to delegate PPR data entry
Project progress report delegation	<input checked="" type="radio"/> Yes <input type="radio"/> No

## 16 APPENDIX A – MINIMUM PRIVILEGES

Institutional agreement role	Minimum access privileges (cannot be revoked)	Additional privileges that can be modified*
